

mediCAD®

For Manufacturers

Put your implants where decisions are made.

Your implants in mediCAD®

mediCAD® connects implant manufacturers with surgeons using digital preoperative planning. With up to **10,000 users working with mediCAD®** every day, your implant portfolio becomes available within a digital planning environment used in clinical practice. The mediCAD® implant database contains **more than 600,000 entries**, including a large number of 3D implant templates.

Always up-to-date

We support the **integration** and **ongoing management** of your implant portfolio in mediCAD®, from 2D and 3D implant data to parametrization and regular portfolio reviews.

An **annual inventory** helps ensure that listed implant templates remain up-to-date, while direct communication with our Application Team provides a dedicated point of contact.

Up to 10,000 users daily

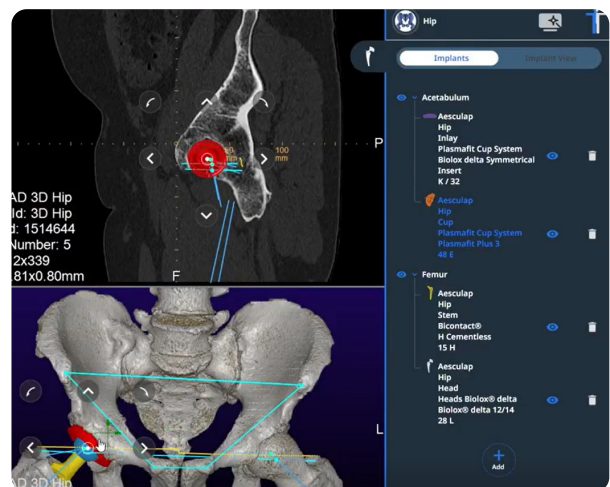

World's largest implant database with 600,000 templates in 2D and 3D

Annual portfolio review

Professional data management

- Implant parametrization*
- Defined time to market
- Direct contact with mediCAD Application Team

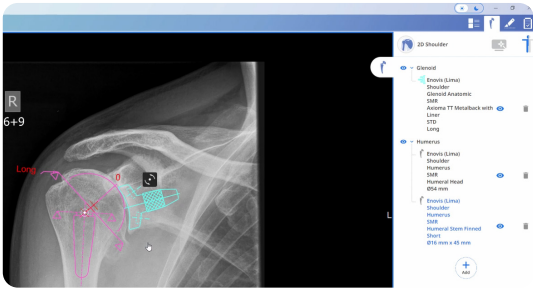

* Availability depends on implant type

Be visible when it matters

With mediCAD® for Manufacturers, your partnership can extend beyond implant data migration. Gold partners receive additional opportunities to communicate their products directly within the mediCAD® environment and mediCADemy, our online training portal.

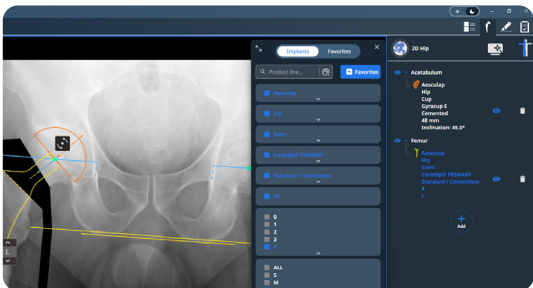

In-product visibility

Reach users directly within the software through **targeted product placement** during the implant selection process and **dedicated communication spaces**.

AI-supported visibility

Within the AI-supported template selection process, Gold partner templates can be pre-selected as part of the selection workflow.

Visibility in mediCADemy

Gold partners can also use **dedicated communication spaces in mediCADemy**, with training videos featuring your implants or the opportunity to showcase your own product videos.
