

Calibration sphere 25mm

The calibration spheres are made of stainless steel. Their hollow-sphere design provides a significant weight reduction compared to conventional solid steel spheres. The smooth surface ensures easy cleaning of the sphere. To achieve the highest level of accuracy, the sphere is positioned at bone level. To facilitate secure attachment to the patient, we offer special disposable adhesive pads.

Amount	Article no.	Price (EUR)
1x sphere	110061-0	76,-
3x sphere	110061-3	204,-
5x sphere	110061-5	314,-
10x sphere	110061-10	571,-

*All prices exclude VAT and shipping costs.

One-way adhesive pads

Amount	Article no.	Price (EUR)
100x pads	110055-0	76,-
300x pads	110055-3	204,-
500x pads	110055-5	314,-
1000x pads	110055-10	571,-

*All prices exclude VAT and shipping costs.

With all models of our scaling stands we can offer easy to handle options to place a scaling reference on your x-ray images.

- Flexible arm for an exact placement
- Variable length (table and clamp)
- 25mm calibration sphere integrated to the front end
- Accurate placement on bone level
- „25“ is shown as the calibration sphere on the x-ray image (just on suction cup base)
- Clamp for all x-rays in a standing position

Calibration sphere 25mm + table with a flexible gooseneck for positioning

Amount	Length	Article no.	Price (EUR)
1x table with a flexible gooseneck for positioning	60cm	110059-0	204,-
	100cm	110059-0-L	292,-
5x table with a flexible gooseneck for positioning	60cm	110059-5	798,-
	100cm	110059-5-L	1165,-

*All prices exclude VAT and shipping costs.

Calibration sphere 25mm + clamp with a flexible gooseneck for positioning

Amount	Length	Article no.	Price (EUR)
1x clamp with a flexible gooseneck for positioning	60cm	110060-0	204,-
	100cm	110060-0-L	292,-
5x clamp with a flexible gooseneck for positioning	60cm	110060-5	798,-
	100cm	110060-5-L	1165,-

*All prices exclude VAT and shipping costs.
